

Please reconsider your proposal to begin BPL (PLC) development. Amateur Radio is not only a tradition, but it is a method of international peace and goodwill. BPL will create extreme interference to our spectrum of use and virtually eliminate our methods of communication. Please do not pass this bill or develop this technology as you will be terminating a valid hobby and learning tool that gave thousands careers and a sense of accomplishment. Thank you for your consideration in this matter. Thank you for allowing us to use radio! It really saved this young man from a very mundane life.
